

Thousands of Parts. Easy Ordering. Fast Shipping.

New Berlin, WI—**Spare Parts Express®** has built their reputation around their customer's needs, providing quality replacement parts for a variety of manufacturer's equipment, easy ordering options, and fast service. As they enter the New Year, **Spare Parts Express®** has made things even easier with the launch of their new website, providing the same parts and fast service at the click of a mouse.

Serving the Plastics and Industrial Process Markets, the new **Spare Parts Express®** website was created with the focus of making a one-stop shop for anyone in need of quality replacement parts, while providing more value added service to new and existing customers. In addition to the added flexibility of ordering parts at anytime, customers will also have access to thousands of searchable parts for their process heating and cooling, recycling, automation and material handling equipment—all at competitive pricing.

Added features, such as the Technical Tips section, provide customers with invaluable knowledge and maintenance tips to help keep their equipment up and running at maximum performance. Customers will also be able to take advantage of special replacement parts discounts and promotions that will further save money.

Available to order, and most in-stock with same day shipping:

- Granulator Knives and Screens
- Contactors
- Solenoid Valves
- Seals and Seal Kits
- Temperature Probes and Temperature Glands
- Immersion Heaters and Immersion Pumps
- Motors

Spare Parts Express® offers spare parts from several manufacturing brands and will assist on special requests to assist the processor in their search for quality replacement parts.

Spare Parts Express® is your home for top quality replacement parts at the lowest prices. Our high quality replacement parts are designed to meet the demanding needs of process heating and cooling, recycling, material handling & automation equipment used in the **Plastics, Food, Chemical, and Pharmaceutical Industries**. For additional information, please contact Parts Product Manager, Paul Hamm at 262-641-3813 or on-line at www.sparepartsexpress.com
